Work Experience

Java Developer at Emonics (February 2017 - current)

- Designed and developed APIs that processed streaming data to power customer recommendation engines which resulted in \$0.9 million in incremental annual revenue;
- Developed Java Bean components to implement business logic that streamlined an internal application by 15%;
- Led the routing of control from web services to Java services using the Camel Framework which reduced development costs by \$1550,000 annually.
- Led a team of one full-time employee and three contractors.

Java Developer at Techsur (April 2014 - January 2017)

- Responsible for API design and development of RESTful Services for the enterprise product in the business;
- Built web services with J2EE that were used by the customer-facing app to improve the time on page for the average user by 3 minutes;
- Worked within an agile team and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first.

Software Engineer Intern at ABC-Impact (March 2013 - April 2014)

- Worked alongside another developer to implement RESTful APIs in Django that enabled our internal analytics team to increase reporting speed by 30%;
- Using Selenium built out a unit testing infrastructure for a client web application that reduced the number of bugs reported by the client by 12% month over month.
